1 Build exact sets
Reverse edges; SCC / DAG
Portfolio unions; deduplicate
2 Fix comparisons
5 baseline rules + 200 orders
Budgets 1, 5, 10, 25, 50, 100
3 Evaluate selection
C: distinct endpoints
H: pair mass; P: all sources
4 Test assumptions
Version continuity; mappings
Depth, ties, identity grouping
5 Check correctness
BFS + incidence + hashes
675 roots in 60 small graphs
6 Report limits
Model assumptions
No execution evidence
